

Kompiler (Bitboutique Records)

Kompiler has been active on the decks as a DJ since 1995. With his highly diversified sets and his involvement in various music scenes, he has become one of the most versatile DJs in Zürich. After having played numerous Drum'n'Bass-Dancefloors outside and in Switzerland under the name „DJ Drift“ he decided to return to spinning **Techno-, Minimal-, House- and Breaks** records in 2000.

He found the ideal platform for his genre-busting activities with the foundation of Bitboutique Records in 2001: the freedom to mix various styles and not get stuck in a category was exactly what Kompiler had been looking for.

Thanks to his close contact to many music scenes, his activities as **Label-co-manager** at Bitboutique Records, **Promoter** of the series „ICON“ and long-time **DJ** with the „mute.ch“- collective, Kompiler has a wide range of know-how on the club- and scene-culture.

Kompiler is constantly trying out new style combinations and is not adhering to apparently defined boundaries: "Im trying to break through the often too rigid categorization of styles and test new and unconventional approaches. The crowd should be irritated from time to time. Only then will new ideas find their way into the party scene."

Having and giving a good time is the number one priority though: crowds body-rocking to his sets prove this again and again. Keep your ears pried for the sounds Kompiler is bringing in his record bag to his next set.
